# OUR CLUB CONVENOR

“

To be a successful Radio Jockey, it is important to understand the listener's mind and host the show accordingly. But with a pinch of creativity

—— CLUB CONVENOR

MISHRA

**Radio** is a way to send [electromagnetic signals](#) over a long distance, to deliver [information](#) from one place to another. A machine that sends radio signals is called a **transmitter**, while a machine that

"picks up" the signals is called a **receiver** or antenna. A machine that does both jobs is a "transceiver".

This is what radio is for others.

**But** For us, as a member of the most entertaining and exciting club of the college radio is an emotion.

The idea of making our identity through our voice is exceptional. Radio has always been a medium where we can voice our thoughts, opinions.

Our college is perfectly equipped with the studio where radio shows has been running for years.

Providing opportunity to each and every student who are interested and also helping them to overcome their stage fright , allowing them to be themselves.

## TECHNICAL HEAD – DHAVAL SOLANKI

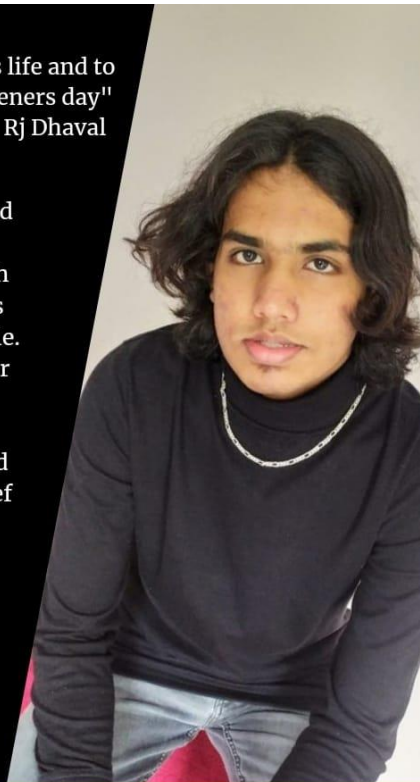

“ Radio is a gateway into People's life and to  
affect the small parts of the listeners day"  
– Rj Dhaval

I love the idea that I can just go out and  
speak up .  
I love that I can talk about things with  
people. I could do all the dumb things  
and just ramble on and entertain people.  
I love the freedom and this is a way for  
me to let out and be free and not be  
bound by the troubles we face.  
I am really lucky that I can do that and  
also brighten up people's days for brief  
moments .
