Sri Vathsava (Event Manager)

Adnan (Volunteer- BBA 1IT)

Harsh (Volunteer- BBA 1IT)

Report:

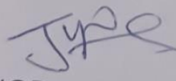

The Power Bytes club of the Department of Computer Science organized an Awareness Drive about the Basics of Computing in the Real World, Safe Internet Browsing and Social Media Presence on November 25, 2022, for all the primary school students of Government Primary School, Chowdinanamiya, Kachiguda. The event had up to 60 students from the school. Through the different stages of the awareness program, the students of Power Bytes Club educated the children on the basics of computing. They started with what a computer is, what it is composed of, and how inputs and outputs work. In the second stage, they made the students aware of the safety threats they might see on the Internet and how they can avoid the same. The third round involved a quiz on all that had been taught to the students. Those that answered said questions correctly were given a prize right away. The overall winners were taken to the fourth stage where they had the chance to operate a laptop for recreational activities, which helped them understand computers better and incited their interest furthermore.

Outcome:

- Students of the government school were taught the basics of how a computer works and how they can operate one
- The students were taught the importance of safe internet browsing and being careful with social media
- Doubts and questions of each student were clarified individually until they were satisfied
- Students were exposed to technology and knowledge they normally wouldn't have access to in their school
- Most enthusiastic Students had the chance to operate electronics
- An interest in computing was incited among the students who have had limited access to technology

Feedback:

The principal of the school, Mrs Karuna Jyothi, personally talked to the students of the club, thanked them for their efforts and urged them to return to the school, emphasizing the effect the program had on students. The students were greatly encouraged to look into computing, evident from their post-program interactions with the volunteers and the members of the Power Bytes Club.
