BLOOD SCREENING CAMP

ACTIVITY REPORT

General Information

Type of Activity	BLOOD SCREENING
Title of the Activity	BLOOD SCREENING CAMP
Date/s	07 February 2024
Time	11AM – 2PM
Venue	Joseph's Hall
Collaboration/Sponsor (if any)	Red Cross Society

Participants Profile

Type of Participants	Students
No. of Participants	164

Synopsis of the Activity (Description)

Highlights of the Activity	Qualified medical professionals conducted a thorough health assessment, including haemoglobin levels, blood pressure, height, and weight, ensuring the well-being and eligibility of donors.
Key Takeaways	The thorough health assessment emphasized the importance of regular health check-ups, contributing to the overall well-being of the participants.
Summary of the Activity	The Blood Screening Camp organized by the Youth Red Cross Wing of St. Joseph's Degree and PG College showcased a well-organized and impactful event. From the efficient dual registration process to the accurate blood group testing and comprehensive health assessment, every step reflected a commitment to donor safety and a seamless experience. The ethical compliance, sterile blood donation process, and post-donation appreciation further enhanced the overall success of the activity. Participants left not only having contributed to a noble cause but also with a heightened awareness of their health and the importance of community engagement.
Follow-up plan	Conduct follow-up health awareness campaigns to encourage regular health check-ups and preventive care.

Detailed Report:

The Youth Red Cross Wing of St. Joseph's Degree and PG College successfully conducted a Blood Donation Camp. The event aimed to promote voluntary blood donation, ensuring a smooth and organized process for the participants.

The event began with a well-structured registration process, accommodating both online and on-spot registrations. Upon arrival, participants underwent a blood group testing procedure using a reliable method that involved placing a drop of blood on a board. The colour changes on the board provided accurate blood group information with a remarkable 99% precision. Subsequent to blood group identification, participants underwent a thorough health assessment conducted by qualified medical professionals. This included the measurement of haemoglobin levels, blood pressure, height, and weight. These vital signs were meticulously recorded to ensure the donor's well-being and eligibility for blood donation.

To maintain transparency and comply with ethical standards, each participant was required to complete a comprehensive consent form. The form collected essential details about the donor's health history, including any existing illnesses or medications. This step aimed to ensure the safety of both the donor and the recipient. Following the health assessment and completion of the consent form, the blood donation process was carried out by skilled medical practitioners. The extraction was performed using sterile techniques, guaranteeing the safety and hygiene of the process.

To express gratitude to the donors for their noble contribution, each participant was provided with refreshments post-donation. In acknowledgment of their altruistic act, participants received a Certificate of Appreciation for their contribution to the blood donation drive. This recognition aimed to instil a sense of pride and accomplishment in the donors, further encouraging future participation in such benevolent endeavours.
