6.	Internship/placement Support	6	6	6
7.	The positive change you experienced in the personality of Student after Course Completion	6	3	7
8.	Examination system in College	7	4	5
9.	Support and Mentoring Provided by the Faculty During Course	7	5	4
10.	E-Content provided and learning material provided for course	7	5	4

Excellent, Good and Satisfactory

Suggestions From Alumni

Little more load on few semesters need to reduce some topics to minimize the overburden	
---	--

Only one internal examination should be conducted	
---	--

Only one internal exam should be conducted	
--	--

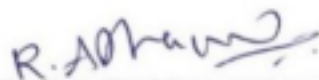

The syllabus (digital design using VHDL) needs a more practical approach with the real world to grab the attention of the students and boost their interest in the subject.

Should conduct more Lab sessions.

Electronics related placement drives must be provided and should have a lab with more computers.
--

We can improve the practical interaction of the subject by focussing more on the projects rather than theory.

Instead of keeping two theory papers we can keep one paper and will focus on the major practical orientation of the projects.

Mr. R. Ashok Kumar
